

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the main board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Sunrise (China) Technology Group Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

CHAIRMAN'S STATEMENT

On behalf of the board (the "Board") of the Directors, I am pleased to present the annual report of Sunrise (China) Technology Group Limited (together with its subsidiaries, the "Group") for the year ended 31 December 2014.

THE YEAR UNDER REVIEW

In 2014, the Group continued to seek environmental related investment opportunities under its stated development goals. With heightened environmental concerns among Chinese government and its citizens, the relevant PRC authorities have promulgated several policies with a view to encourage the development of environmental related industry. The Group, being provided such valuable opportunities, has been proactively commencing development and reorganisation of its subsidiaries engaged in the environmental related sector.

The Group's core business, Heilongjiang Province Shengyan New Energy Development Limited ("Shengyan") is principally engaged in the production and sale of straw fuel briquettes. To support the green development concept promoted by China's 12th Five Year Plan, Shengyan has constructed 1 main plant and around 30 sub-plants in Baiquan County of Heilongjiang Province to recycle local waste straw into biomass product which can be used as a substitute for fossil fuels like coal through treatment process. Such business not only accelerates strategic measures for energy saving and emission reduction, but also protects the ecological environment from being polluted.

In 2014, Shengyan faced significant challenges in its straw fuel briquettes' demand due to the growth of coal consumption as coal price dropped sharply during the year 2013 and 2014. Nevertheless, the Group is confident that better sales and profit margin will be achieved again in near future as air pollution is a very serious national problem and when coal price rises again.

The Group's other subsidiary, Jiangsu Shengyi Environmental Technology Co., Ltd ("Shengyi") was principally engaged in the provision of technological desulphurisation service, which could effectively reduce sulphur dioxide and hydrogen sulfide emissions generated from burning of fossil fuels such as coal, natural gas and oil products. Since the Group's acquisition of Shengyi in September 2011, Shengyi recorded a net loss after tax of approximately HK\$11.4 million and HK\$6.1 million for the years ended 31 December 2012 and 2013 respectively. Hence, the Group decided to dispose of Shengyi for a total consideration of HK\$51.0 million, and the disposal was completed on 30 January 2014, resulting in a gain on disposal of approximately HK\$50.8 million. The Consideration represented a premium of approximately 434.7% to the Group's total investment in Shengyi of approximately HK\$9.5 million since acquisition, the disposal provided an opportunity for the Group to generate gains from realising its investment in Shengyi and to devote its resources to the operations of the remaining Group's businesses and to improve the Group's working capital.

To avoid the over-reliance on the diminishing manufacturing and sales of straw briquettes business, we started to diversify our business by tapping into the natural resources and commodities trading business. During the year ended 31 December 2014, the Group started to engage in the trading of crude palm oil via its wholly-owned subsidiary, the underlining importance is to widen the Group's business network in the field of commodities trading.

Subsequent to the reporting date, the Company also started to engage in the trading of garment accessories via its wholly-owned subsidiary. The Board will continue to grasp any further business and development opportunity to provide a sound return to our shareholders and the growth of the Group as a whole.

CHAIRMAN'S STATEMENT

LOOKING AHEAD

In recent years, there have been different levels of environmental issues exposed in various regions of the PRC, continuously boosting public awareness of environmental protection throughout the country and making the Chinese government to strive for integrated management enhancement of pollution prevention, energy conservation and emission reduction at the enterprise level. Benefited from the enormous support given by the government towards environmental related industry, the environmental sector is filled with promising development opportunities and clear direct guidelines, further fortified the Group's objective to develop the environmental related industry.

In 2015, the Group will continue to strengthen the existing business of Shengyan, proactively explore new business scope and continuously seek other suitable investment opportunities.

Besides, the Group will continue to strictly control risks, strengthen internal management, integrate dominant resources and develop a cautious investment strategy in order to create a better return for its shareholders.

APPRECIATION

On behalf of the Board and management, I would like to express gratitude to the Group's staff for their unwavering dedication and hard work during the year. I would also like to extend my thanks to all shareholders and business partners who have supported the Company throughout its ups and downs.

Ma Arthur On-hing
Executive Director

Hong Kong, 27 March 2015

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Manufacture and Sales of Straw Briquettes

Shengyan was incorporated in the PRC in July 2010 with a registered capital of RMB30 million and is principally engaged in the production and sales of straw fuel briquettes, which is a type of biofuels and a substitute for coal in the northeast region of the PRC. The Group completed the acquisition of its 51% interest in Shengyan in December 2012. The business model of Shengyan is briefly summarised as follows:

- Straw collection – purchase, collect and strap raw straw from farmers and transport to the warehouses for storage;
- Straw chopping – the collected straw is then crushed into fine powder through crushing equipments;
- Straw briquetting – the powdered straw is then put into the briquetting press machines from where it is compressed and processed before straw fuel briquettes are made; and
- Sales of finished products – upon receiving sales orders, the straw fuel briquettes are then sold to customers.

The customers of Shengyan are mainly consisted of companies located at Heilongjiang Province in the PRC, which are engaged in agricultural and manufacturing industries and use the straw fuel briquettes for different usage such as heat generation. Revenue of Heilongjiang Shengyan is mainly derived from the sales of straw fuel briquettes by sales orders from customers and Shengyan purchases raw straw directly from many different local farmers located at the Baiquan County of Heilongjiang Province.

Provision of Technological Desulphurisation Services

Shengyi was principally engaged in the provision of technological desulphurisation service, which could effectively reduce sulfur dioxide and hydrogen sulfide emissions generated from burning of fossil fuels such as coal, natural gas and oil products. Since there was a slowdown in overall economic growth during the past years and many traditional chemical manufacturers were suffering from cash flow shortages, existing contracts of Shengyi were experiencing slow progress.

Reference is made to the announcement of the Company dated 23 December 2013 and the circular of the Company dated 30 January 2014 in relation to the disposal of a subsidiary, the Company and a purchaser entered into a sale and purchase agreement, pursuant to which the Company conditionally agreed to dispose Confident Echo Holdings Limited and its subsidiaries including Shengyi at an aggregate consideration of HK\$50,980,962. The disposal was completed on 30 January 2014.

Trading of Natural Resources and Commodities

The Group's natural resources and commodities business segment has commenced operation in the fourth quarter. During the year, a total of 5,750 metric tonnes ("MT") of crude palm oil was traded, contributing aggregate revenue of approximately HK\$30 million to the Group. The Group's trading in crude palm oil was carried out in the form of trade-by-trade basis.

The Board considered that the Group was new to the commodities trading business, the profit margin as expected was thin. However, the underlining importance is to widen the Group's business network in the field of commodities trading. The Group will negotiate with suppliers and customers in order to achieve better trading terms in the upcoming trades.

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW

For the year ended 31 December 2014, the turnover of the Group was decrease to approximately HK\$49.0 million (2013: 510.7 million), representing a decrease by approximately 90.4% when compared with the corresponding year of 2013. The decrease in turnover was mainly attributed to the disposal of Loudspeaker Business, of which, revenue generated was approximately HK\$449.1 million on 2013.

The Group disposed Shengyi's segment during the first quarter of the year, the aggregate consideration was HK\$51.0 million. After deducting the net asset value, the Group generated a gain of approximately HK\$50.8 million from the disposal.

The Group has commenced its environmental related businesses since 2012. Following to the disposal of Shengyi, Shenqyan is the remaining business. Revenue generated from Shenqyan was decreased by 34.0% to 18.8 million (2013: 28.5 million) for the year ended 31 December 2014. During the year, the Shengyan's segment recorded a substantial loss of approximately HK\$76.4 million due to the additional provision for impairment on plant and equipment, inventories, trade and other receivables.

During the fourth quarter of the year, the Group has commenced trading of natural resources and commodities business. Revenue generated from trading of crude palm oil was HK\$30.2 million for the year ended 31 December 2014. Although the profit margin from this business was thin, there was positive contribution of HK\$0.2 million being recorded from the trade.

LIQUIDITY, FINANCIAL RESOURCES AND CAPITAL STRUCTURE

For the year ended 31 December 2014, the Group's major business operations took place in China and Hong Kong, financed mainly by the cash revenue generated from operating activities and by corporate borrowings. As at 31 December 2014, the Group had cash and bank balances of approximately HK\$1.0 million (2013: HK\$0.5 million).

As at 31 December 2014, the Group's total indebtedness comprised of the amount due to Noteholder of approximately HK\$24.1 million (2013: HK\$46.0 million), corporate bonds of approximately HK\$24.0 million (2013: Nil) and other borrowings of approximately HK\$24.1 million (2013: Nil).

As at 31 December 2014, the Group's outstanding number of issued shares of HK\$0.01 each was 431,764,974 shares (2013: 431,764,974 shares).

The Group's gearing ratio, as a percentage of total indebtedness over total indebtedness and total equity, as at 31 December 2014 was 70.3% (2013: 32.3%).

MANAGEMENT DISCUSSION AND ANALYSIS

MATERIAL ACQUISITIONS AND DISPOSALS OF SUBSIDIARIES AND AFFILIATED COMPANIES

Save as disclosed in the note 38 to the consolidated financial statements, the Group did not have other material acquisitions and disposals of subsidiaries and affiliated companies.

CAPITAL COMMITMENTS AND CONTINGENT LIABILITIES

As at 31 December 2014, the Group did not have any significant capital commitments (2013: Nil).

Except as disclosed in the section headed "Legal Proceedings", as at 31 December 2014, the Group did not have any significant contingent liabilities (2013: Nil).

LEGAL PROCEEDINGS

Reference is made to the Company's announcement dated 25 July 2014 in relation to the writ of summons received by the Company. It was alleged in the Writ that a total sum of HK\$10,000,000 was advanced by Total Shares Limited (the "Plaintiff") to Mr. Shan Xiaochang ("Mr. Shan"), the former Board Chairman and Chief Executive Officer, pursuant to a loan agreement (the "Loan Agreement") dated 9 August 2013 made between the Plaintiff as the lender and Mr. Shan as the borrower, the repayment of which was guaranteed by the Company as a guarantor by a guarantee (the "Guarantee") signed by the Company in favour of the Plaintiff dated 9 August 2013. The amount of the claim specified in the Writ was HK\$10,000,000 plus the accrued unpaid interest under the Loan Agreement and other interest.

As no meeting at the Board or shareholders of the Company was held to approve the Guarantee or authorise any Director to sign the Guarantee for and on behalf of the Company, the Board is of the view that the Guarantee is not binding on or enforceable against the Company and the Claim has no merit against the Company. The Company will vigorously dispute the allegations under the Writ and is in the process of seeking independent legal advice.

FOREIGN EXCHANGE EXPOSURE

During the year under review, the Group's transactions were mainly denominated in Renminbi, Hong Kong dollars and US dollars which exposed the Group to currency risk. The Group currently does not have a foreign currency hedging policy in place but the management continuously monitors foreign exchange exposure and will consider hedging significant foreign exchange exposure should the need arise.

PLEDGE OF ASSETS

Save as disclosed in the note 22 to the consolidated financial statements, the Group did not have any substantial pledge of assets (2013: Nil).

EMPLOYEES AND REMUNERATION POLICY

At 31 December 2014, the Group had about 27 (2013: 113) employees. The Group's staff costs, including directors' emoluments, employees' salaries and retirement benefits scheme contribution amounted to approximately HK\$5.5 million (2013: HK\$107.6 million).

The Group believes that its staff is one of the Group's most important assets. Aiming at providing competitive salary packages, the Group adjusts employees' salary level in close association with the performance, qualifications and experience of individual staff as well as labour market conditions. In addition to the regular remuneration, discretionary bonus and share options may be awarded to eligible employees with reference to individual performance and the Group's business performance. The Group is also committed to providing appropriate on-going training to staff members to equip them for future career development.

At each annual general meeting one-third of the Directors for the time being, or, if their number is not three or a multiple of three, then the number nearest to but not less than one-third, shall retire from office by rotation provided that every Director, including those appointed for a specific term, shall be subject to retirement by rotation at least once every three years. A retiring Director shall be eligible for re-election. The Company at the general meeting at which a Director retires may fill the vacated office. The Directors to retire by rotation shall include (so far as necessary to obtain the number required) any Director who wishes to retire and not to offer himself for re-election. Any further Directors so to retire shall be those who have been longest in office since their last re-election or appointment and so that as between persons who became or were last re-elected Directors on the same day those to retire shall (unless they otherwise agree among themselves) be determined by lot.

CORPORATE GOVERNANCE REPORT

In compliance with rules 5.05(1) and (2) of the GEM Listing Rules, the Company has appointed four independent non-executive Directors, at least one of whom has appropriate professional qualifications or accounting or related financial management expertise. For a Director to be considered independent, the Board must determine that the Director does not have any direct or indirect material relationship with the Group. In determining the independence of the Directors, the Board follows the requirements set out in the GEM Listing Rule.

CONTINUOUS PROFESSIONAL DEVELOPMENT

For the year ended 31 December 2014, all Directors have participated in continuous professional development, by attending conferences, seminars and in-house briefing, and giving talks and reading materials relevant to their duties, responsibilities and the Group's business in order to develop, refresh and update their knowledge and skills. Further, the Directors have received in-house trainings which covered corporate governance and listing rules and regulations.

CHAIRMAN AND CHIEF EXECUTIVE OFFICER

The Board was led by the former Chairman and the former Chief Executive Officer, Mr. Shan Xiaochang, who was responsible for corporate planning, business development strategy and overall direction of the Group. The senior management is responsible for the day-to-day operations of the Group under the leadership of Mr. Shan Xiaochang.

Code Provision A.2.1

The code provision stipulated that the roles of chairman and chief executive officer should be separate and should not be performed by the same individual.

Mr. Shan Xiaochang, an executive Director resigned on 25 March 2015, had served both roles as the Chairman and the Chief Executive Officer since September 2010. In view of the scale and operations of the Company and the fact that daily operations of the Group's business was delegated to the senior executives, the Board was of the view that this had not compromised accountability and independent decision-making. In addition, the audit committee of the Company composed exclusively of independent non-executive Directors and the independent non-executive Directors had free and direct access to the Company's external auditors and independent professional advisors when considered necessary.

Code Provision E.1.2

The code provision stipulated that the chairman of the Board should attend the annual general meeting of the Company.

Due to urgent business engagement, Mr. Shan Xiaochang, the former Chairman of the Board, was unable to attend the annual general meeting of the Company held on 28 July 2014 (the "Meeting"). Mr. Ma Arthur On-hing, an executive Director, presided as the chairman at the Meeting in accordance with the articles of association of the Company.

Subsequent to the end of the reporting period, Mr. Shan Xiaochang has tendered his resignation as an executive Director, the Chairman, the Chief Executive Officer and other positions in the Company with effect from 25 March 2015.

The Board is in the process of identifying a suitable candidate to assume the positions of the Chairman and the Chief Executive Officer. Further announcement will be made upon confirmation of the appointments.

INDEPENDENT AUDITOR'S REPORT

**TO THE SHAREHOLDERS OF
SUNRISE (CHINA) TECHNOLOGY GROUP LIMITED**
(Incorporated in the Cayman Islands with limited liability)

We have audited the consolidated financial statements of Sunrise (China) Technology Group Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") set out on pages 25 to 96, which comprise the consolidated statement of financial position as at 31 December 2014, and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

DIRECTORS' RESPONSIBILITY FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these consolidated financial statements based on our audit and to report our opinion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

INDEPENDENT AUDITOR'S REPORT

OPINION

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Group as at 31 December 2014, and of the Group's loss and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

EMPHASIS OF MATTERS

Without qualifying our opinion, we draw attention to Note 2 to the consolidated financial statements regarding the adoption of going concern basis on which the consolidated financial statements have been prepared. The Group incurred a loss of HK\$59,471,000 for the year ended 31 December 2014.

The conditions set out in Note 2 to the consolidated financial statements indicate the existence of a material uncertainty which may cast significant doubt on the ability of the Group to continue as a going concern. The consolidated financial statements do not include any adjustments that would result from a failure to obtain the funding as referred to in Note 2 for financing the working capital and financial commitments of the Group and the Company for the foreseeable future.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

1. GENERAL

Sunrise (China) Technology Group Limited (the “Company”) is a limited liability company incorporated in the Cayman Islands, and the issued shares of which are listed on The Growth Enterprise Market of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”). The address of the registered office and principal place of business of the Company are disclosed in the corporate information section of the annual report.

The Company is principally engaged in investment holding. The principal activities of the Company’s principal subsidiaries are set out in Note 44 to the financial statements.

The consolidated financial statements are presented in Hong Kong dollar (“HK\$”), which is the same as the functional currency of the Company.

2. BASIS OF PREPARATION OF CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements have been prepared on a going concern basis notwithstanding the fact that the Group incurred a loss of HK\$59,471,000 for the year ended 31 December 2014. In the opinion of the directors of the Company, the Group should be able to continue as a going concern in the next year from the date of approval of these consolidated financial statements taking into consideration the measures, which include, but are not limited to, the following:

- (a) On 29 January 2015, the Company issued 86,352,000 new shares for a total cash proceeds of HK\$30,223,200 (before expenses).
- (b) On 26 March 2015, the Company entered into a loan agreement with an independent third party under which a loan facility of HK\$60,000,000 was granted to the Company. The loan, which is unsecured, carries interest at 20% per annum and repayable on the business day falling on eighteen months from the date of the first drawdown of any amount of the loan. Up to the date of approval of these consolidated financial statements, this loan facility was not utilised by the Company.

Based on the aforesaid factors, the directors are satisfied that the Group will have sufficient financial resources to meet its financial obligations as and when they fall due for the foreseeable future. Accordingly, the consolidated financial statements have been prepared on a going concern basis.

3. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS (“HKFRSs”)

New and revised HKFRSs applied in current year

In the current year, the Group has applied the following new and revised HKFRSs issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”):

Amendments to HKFRS 10, HKFRS 12 and HKAS 27	Investment Entities
Amendments to HKAS 32	Offsetting Financial Assets and Financial Liabilities
Amendments to HKAS 36	Recoverable Amount Disclosures for Non-Financial Assets
Amendments to HKAS 39	Novation of Derivatives and Continuation of Hedge Accounting
HK(IFRIC) – Int 21	Levies

The application of the new and revised HKFRSs in the current year had no material impact on the consolidated financial statements.

3. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS (“HKFRSs”) (continued)

HKFRS 9 Financial Instruments

HKFRS 9 issued in 2009 introduces new requirements for the classification and measurement of financial assets. HKFRS 9 was subsequently amended in 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition, and further amended in 2013 to include the new requirements for general hedge accounting. Another revised version of HKFRS 9 was issued on 2014 mainly to include a) impairment requirements for financial assets and b) limited amendments to the classification and measurement requirements by introducing a ‘fair value through other comprehensive income’ (FVTOCI) measurement category for certain simple debt instruments.

Key requirements of HKFRS 9 are described below:

- All recognised financial assets that are within the scope of HKAS 39 “Financial Instruments: Recognition and Measurement” are subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. Debt instruments that are held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets, and that have contractual terms of the financial asset and give rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured at FVTOCI. All other debt investments and equity investments are measured at their fair values at the end of subsequent reporting periods. In addition, under HKFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognised in profit or loss.
- With regard to the measurement of financial liabilities designed as at fair value through profit or loss, HKFRS 9 requires that amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of the effects of changes in the liability’s credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value of financial liabilities attributable to changes in the financial liabilities’ credit risk are not subsequently reclassified to profit or loss. Under HKAS 39, the entire amount of the change in fair value of the financial liability designated as fair value through profit or loss was presented in profit or loss.
- In relation to the impairment of financial assets, HKFRS 9 requires an expected credit loss model, as opposed to an incurred credit loss model under HKAS 39. The expected credit loss model requires an entity to account for expected credit losses and changes in credit risk since initial recognition. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.
- The new general hedge accounting requirements retain the three types of hedge accounting. However, greater flexibility has been introduced to the types or transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an ‘economic relationship’. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about an entity’s risk management activities have also been introduced.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

3. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS (“HKFRSs”) (continued)

HKFRS 9 Financial Instruments (continued)

The directors of the Company anticipate that the application of HKFRS 9 in the future may have significant impacts on amounts reported in respect of the Group’s financial assets and financial liabilities. Regarding the Group’s financial assets and liabilities, it is not practicable to provide a reasonable estimate of that effect until a detailed review has been completed.

HKFRS 15 Revenue from Contracts with Customers

In July 2014, HKFRS 15 was issued which establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. HKFRS 15 will supersede the current revenue recognition guidance including HKAS 18 “Revenue”, HKAS 11 “Construction Contracts” and the related Interpretations when it becomes effective.

The core principle of HKFRS 15 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the Standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Under HKFRS 15, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when ‘control’ of the goods or services underlying the particular performance obligation is transferred to the customer. Far more prescriptive guidance has been added in HKFRS 15 to deal with specific scenarios. Furthermore, extensive disclosures are required by HKFRS 15.

The directors of the Company anticipate that the application of HKFRS 15 in the future may have material impact on the amounts reported and disclosures made in the Group’s consolidated financial statements. However, it is not practicable to provide a reasonable estimate of the effect of HKFRS 15 until the Group performs a detailed review.

The directors of the Company anticipate that the application of other new and revised HKFRSs in issue but not yet effective will have no material impact on the consolidated financial statements.

4. SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

The consolidated financial statements have been prepared in accordance with HKFRSs issued by the HKICPA. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited and by the Hong Kong Companies Ordinance.

The consolidated financial statements have been prepared on the historical cost basis except for certain properties and financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in the exchange for goods.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of HKFRS 2, leasing transactions that are within the scope of HKAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in HKAS 2 or value in use in HKAS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each item of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Changes in the Group's ownership interests in existing subsidiaries

Changes in the Group's ownership interests in existing subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

When the Group loses control of a subsidiary, a gain or loss is recognised in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable HKFRSs). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under HKAS 39 or, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that:

- deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with HKAS 12 “Income Taxes” and HKAS 19 “Employee Benefits” respectively;
- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with HKFRS 2 “Share-based Payment” at the acquisition date (see the accounting policy below); and
- assets (or disposal groups) that are classified as held for sale in accordance with HKFRS 5 “Non-current Assets Held for Sale and Discontinued Operations” are measured in accordance with that standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer’s previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer’s previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity’s net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests’ proportionate share of the recognised amounts of the acquiree’s identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at their fair value or, when applicable, on the basis specified in another HKFRS.

When a business combination is achieved in stages, the Group’s previously held equity interest in the acquiree is remeasured to fair value at the acquisition date (i.e. the date when the Group obtains control) and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Business combinations (continued)

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, and additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business (see the accounting policy above) less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent period.

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods sold in the normal course of business, net of discounts and sales related taxes.

Sale of goods

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and
- the cost incurred or to be incurred in respect of the transaction can be measured reliably.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue recognition (continued)

Construction contract

The Group's policy for recognition of revenue from construction contracts is described in the accounting policy for construction contracts below.

Service income

Service income, which represents income from after-sale services of the Group's sales, is recognised when the services have been rendered by the Group.

Rental income

The Group's accounting policy for recognition of revenue from operating leases is described in the accounting policy for leasing below.

Interest income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Construction contracts

Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as expense immediately.

When contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is shown as amounts due from customers for contract work. For contracts where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is shown as the amounts due to customers for contract work. Amounts received before the related work is performed are included in the consolidated statement of financial position, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the consolidated statement of financial position under trade receivables.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

The Group as lessee

Operating lease payments are recognised as an expense on a straight-line basis over the term of the relevant leases.

Leasehold land for own use

When a lease includes both land and building elements, the Group assesses the classification of each element as a finance or an operating lease separately based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Group, unless it is clear that both elements are operating leases in which case the entire is classified as an operating lease. Specifically, the minimum lease payments (including any lump-sum upfront payments) are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land element and building element of the lease at the inception of the lease.

To the extent the allocation of the lease payments can be made reliably, interest in leasehold land that is accounted for as an operating lease is presented as “prepaid land lease payments” in the consolidated statement of financial position and is amortised over the lease term on a straight-line basis. When the lease payments cannot be allocated reliably between the land and building elements, the entire lease is generally classified as a finance lease and accounted for as property, plant and equipment.

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in the respective functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchanges prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss in the period in which they arise.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group’s foreign operations are translated into the presentation currency of the Group (i.e. HK\$) using exchange rates prevailing at the end of each reporting period. Income and expenses items are translated at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case the exchange rates at the date of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of exchange fluctuation reserve.

Foreign currencies (continued)

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Government grants and subsidies

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

Government subsidies relating to the Group's manufacture and sale of goods are recognised as income when it is probable that the economic benefits associated with the subsidies will flow to the Group and the related goods have been sold.

Retirement benefit costs

Payments to defined contribution retirement benefit schemes are charged as an expense when employees have rendered services entitling them to the contributions.

Share-based payment arrangements

Share-based payment transactions of the Company

For grants of share options that are conditional upon satisfying specified vesting conditions, the fair value of services received is determined by reference to the fair value of share options granted at the date of grant and is expensed on straight-line basis over the vesting period, with a corresponding increase in equity (share option reserve).

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Share-based payment arrangements (continued)

Share-based payment transactions of the Company (continued)

At the end of the reporting period, the Group revises its estimates of the number of options that are expected to ultimately vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to share option reserve.

For share options that vest immediately at the date of grant, the fair value of the share options granted is expensed immediately to profit or loss.

When share options are exercised, the amount previously recognised in share option reserve will be transferred to share premium. When share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share option reserve will be transferred to retained earnings.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the consolidated statement of profit or loss and other comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax base used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary difference to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax is recognised in profit or loss, except when it relates to items that are recognised in other comprehensive income or directly in equity, in which case the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

Property, plant and equipment

Property, plant and equipment (other than construction in progress as described below), including buildings held for use in the production or for administrative purposes, are stated in the consolidated statement of financial position at cost or valuation less subsequent accumulated depreciation and accumulated impairment losses, if any.

Valuations are performed frequently enough to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Changes in the value of the revalued asset are dealt with as movements in the asset revaluation reserve. If the total of this reserve is insufficient to cover a deficit, on an individual asset basis, the excess of the deficit is charged to profit or loss. Any subsequent revaluation surplus is credited to profit or loss to the extent of the deficit previously charged. An annual transfer from the asset revaluation reserve to retained earnings is made for the difference between the depreciation based on the revalued carrying amount of an asset and the depreciation based on the asset's original cost. On disposal of a revalued asset, the relevant portion of the asset revaluation reserve realised in respect of previous valuations is transferred to retained earnings as a movement in reserves.

Depreciation is recognised so as to write off the cost or valuation of assets (other than construction in progress) less their residual values over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Construction in progress includes property, plant and equipment in the course of construction for production or for administrative purposes and are carried at cost less any recognised impairment loss. Costs include professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy.

Construction in progress is classified to the appropriate category of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation. Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at fair value. Gains and losses arising from changes in the fair value of investment properties are included in profit or loss in the period in which they arise.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognised.

Intangible assets

Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, if any. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gain and losses arising from derecognition of an intangible asset, which is measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

Impairment losses on tangible and intangible assets other than goodwill

At the end of the reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or a cash generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised as income immediately.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined on the weighted average basis and, in case of work in progress and finished goods, comprises direct materials, direct labour and an appropriate proportion of overhead. Net realisable value is based on estimated selling price less the estimated costs of completion and costs necessary to make the sale.

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments

Financial assets and financial liabilities are recognised in the consolidated statement of financial position when a group entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial assets

The Group's financial assets are classified into loans and receivables. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Interest income is recognised on an effective interest basis for debt instruments.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Subsequent to initial recognition, loans and receivables (including trade and other receivables and bank balances and cash) are carried at amortised cost using the effective interest method, less any identified impairment losses (see accounting policy on impairment loss on financial assets below).

Impairment loss on financial assets

Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been affected.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial assets (continued)

Impairment loss on financial assets (continued)

For all financial assets, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as default or delinquency in interest and principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

For certain categories of financial assets, such as trade and other receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the credit period, observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade and other receivables, where the carrying amount is reduced through the use of an allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss. When trade and other receivables are considered uncollectible, they are written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to profit or loss.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Financial liabilities and equity instruments

Financial liabilities and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial liabilities and equity instruments (continued)

Convertible loan notes

Convertible loan notes issued by the Group that contain both liability and conversion option components are classified separately into their respective items on initial recognition. Conversion option that will be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is a conversion option derivative. At the date of issue, the conversion derivative is recognised at fair value, any excess of proceeds from the notes over the amount initially recognised as the derivative component is recognised as liability.

In subsequent periods, the liability component of the convertible loan notes is carried at amortised cost using the effective interest method, until extinguished on conversion or maturity. The conversion option derivative is measured at fair value with changes in fair value recognised in profit or loss.

When the convertible loan notes are converted, the carrying amount of the liability portion together with the fair value of the conversion derivative at the time of conversion are transferred to share capital and share premium as consideration for the shares issued. When the convertible loan notes are redeemed, the difference between the redemption amount and the carrying amounts of both components is recognised in profit or loss.

Transaction costs that relate to the issue of the convertible loan notes are allocated to the liability and conversion option components in proportion to the allocation of the proceeds. Transaction costs relating to the conversion option derivative is recognised in profit or loss immediately. Transaction costs relating to the liability component are included in the carrying amount of the liability portion and amortised over the period of the convertible loan notes using the effective interest method.

Financial liabilities at fair value through profit or loss ("FVTPL")

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or it is designated as at FVTPL on initial recognition.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and HKAS 39 Financial Instruments: Recognition and Measurement permits the entire combined contract (asset or liability) to be designated as at FVTPL.

Financial liabilities at FVTPL (including embedded derivatives of convertible loan notes and unlisted warrants) are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability, if any.

Financial liabilities and equity instruments (continued)

Other financial liabilities

Other financial liabilities (including trade and other payables, corporate bonds payable, other borrowings, amount due to noteholder, amount due to a director and convertible loan notes) are subsequently measured at amortised cost, using the effective interest method.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or where appropriate, a shorter period, to the net carrying amount on initial recognition.

Interest expense is recognised on an effective interest basis.

Derecognition

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss.

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

5. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

The major judgments, estimates and assumptions that have the most significant effect on the amounts recognised in the financial statements and have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are set out below:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

5. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES (continued)

Impairment of non-financial assets (other than goodwill)

The Group assesses whether there are any indicators of impairment for all non-financial assets at the end of each reporting period. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The calculation of the fair value less costs to sell is based on available information from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

Useful life and residual value of property, plant and equipment

The Group determines the depreciation amount of property, plant and equipment based on the estimated useful life and residual value, which are reviewed at the end of each reporting period. The principal assumptions for the Group's estimation of the useful life and residual value include those related to the mode of operations, government regulations and scrap value of property, plant and equipment in future.

Estimated allowance for inventories

Inventories are written down to net realisable value based on an assessment of their realisability. Write-downs on inventories are recorded where events or changes in circumstances indicate that the balances may not be realised. The identification of write-downs requires the use of judgment and estimates. Where the expectation is different from the original estimate, such difference will have impact on the carrying value of inventories and write-down of inventories in the period in which such estimate is changed. As at 31 December 2014, the carrying amount of inventories is HK\$27,694,000 (2013: HK\$28,623,000). Write down of inventories amounted to HK\$19,914,000 (2013: HK\$12,508,000) has been charged to profit or loss in respect of the year.

Impairment loss recognised in respect of trade and other receivables

The Group maintains an allowance for estimated loss arising from the inability of its debtors to make the required payments. The Group makes its estimates based on the ageing of debtors' balances, debtors' creditworthiness, and historical write-off experience. If the financial condition of its debtors was to deteriorate so that the actual impairment loss might be higher than expected, the Group would be required to revise the basis of making the allowance and its future results would be affected. As at 31 December 2014, the carrying amount of trade and other receivables amounted to an aggregate of HK\$60,099,000, net of accumulated impairment losses of HK\$49,737,000 (2013: HK\$98,460,000, net of accumulated impairment losses of approximately HK\$23,209,000), of which trade and other receivables of HK\$Nil (2013: HK\$23,034,000), net of impairment losses, have been reclassified as assets held for sale.

Fair value of unlisted warrants

The unlisted warrants are carried at fair value in the consolidated statement of financial position with changes in fair value recognised in profit or loss. In estimating the fair value of the unlisted warrants, the Group uses valuation performed by professorial valuers which is based on various inputs and estimates with reference to quoted market rates and adjusted for specific features of the unlisted warrants. If the input and estimates applied in the valuation are different, the carrying amount the unlisted warrants may change.

Control in a subsidiary, Heilongjiang Province Shengyan New Energy Development Limited (“Shengyan”)

On 10 December 2012, a wholly-owned subsidiary of the Company, Rise Joy Investment Limited, acquired 51% equity interest in Shengyan from a third party (the “Vendor”), under which the Group has gained control and the Group’s 51% interest in Shengyan is accounted for and consolidated into the consolidated financial statements of the Group. Key judgments adopted in concluding that the Group has obtained control over Shengyan are as follows:

- (i) Rise Joy and the Vendor entered into a trust declaration agreement, pursuant to which the 51% equity interest is held by the Vendor in trust for Rise Joy with effect from 10 December 2012. The directors consider that such 51% equity interest in Shengyan was effectively acquired by Rise Joy on 10 December 2012, the date on which Shengyan is regarded as a subsidiary of the Company. The approval by the relevant governmental departments of Mainland China of the acquisition is yet to be obtained.
- (ii) The Group has consistently and regularly held a majority of the voting rights exercised at shareholders’ meetings of Shengyan; and
- (iii) The shareholding of other non-controlling interests is dispersed and the chance of all other shareholders getting together to vote against the Group is remote.

6. OPERATING SEGMENT INFORMATION

For management purposes, the Group is organised into the following reportable operating segments based on their products and services:

Continuing operations:

- Manufacture and sales of straw briquettes
- Provision of technological desulphurisation services
- Trading of commodities

Discontinued operations:

- Manufacture and sales of loudspeaker systems

Management monitors the results of the Group’s operating segments separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reportable segment profit/loss, which is a measure of adjusted profit/loss before tax. The adjusted profit/loss before tax is measured consistently with the Group’s profit/loss before tax except that interest income, gain on disposal of subsidiaries, gain/loss on change in fair value of embedded derivatives of convertible loan notes and unlisted warrants, loss on redemption of convertible loan notes, finance costs, as well as other head office and corporate expenses are excluded from such measurement.

Segment assets exclude unallocated head office and corporate assets as these assets are managed on a group basis.

Segment liabilities exclude unallocated head office and corporate liabilities as these liabilities are managed on a group basis.

17. PROPERTY, PLANT AND EQUIPMENT (continued)

The property, plant and machinery, other than buildings and construction in progress, are carried at cost less accumulated depreciation and accumulated impairment, if any. The buildings, which are situated in the PRC, are carried at fair value on Level 3 fair value measurement. The construction in progress is carried at cost less accumulated impairment, if any.

The above items of property, plant and equipment, other than construction in progress, are depreciated on a straight-line basis over their estimated useful lives, less their residual values as follows:

Buildings	Remaining lease terms of the relevant land
Leasehold improvements	5-10 years
Machinery, furniture and equipment	3-20 years
Motor vehicles	2-10 years

The fair values of the Group's buildings at 31 December 2014 and 31 December 2013 have been arrived at on the basis of valuations carried out at those dates by Shing Yin Appraisal Limited, an independent valuer not related to the Group, and management of the Group respectively. The valuations at those date were estimated using the depreciated replacement cost approach taking account of the aggregate amount of the new replacement cost of the buildings and other site works, from which appropriate deductions may then be made to allow for the age, condition, economic or obsolescence and environmental factors (the "Depreciated Replacement Cost Approach"). There has been no change from the valuation technique used in the prior year. In determining the fair value of the buildings, the highest and best use of the buildings is their current use.

Reconciliation of Level 3 fair value measurements is as follows:

	Buildings HK\$'000
At 1 January 2014, at fair value	17,227
Transfer during the year	(8,759)
Depreciation for the year	(1,653)
Exchange realignment	(76)
	<hr/>
At 31 December 2014, at fair value	6,739

Had the Group's buildings been measured in a historical cost basis, their carrying amount at 31 December 2014 would have been HK\$6,739,000 (2013: HK\$17,227,000).

Following the Group's evaluation that no government subsidy will be granted for the Group's business of manufacture and sales of straw briquettes in the current and future years, management of the Company conducted a review of the economic viability of the Group's property, plant and equipment relating to this business and considered it appropriate to recognise impairment loss of HK\$20,499,000 (2013: Nil) on such assets based on their estimated fair value less costs to sell. Such impairment loss has been recognised in profit or loss in respect of the year and included in other operating expenses (Note 8).

23. TRADE RECEIVABLES (continued)

The majority of the Group's sales are on open account in accordance with terms specified in the contracts governing relevant transactions. An average credit period of 180 days (2013: 180 days) is granted to customers. The Group seeks to maintain strict control over its outstanding receivables. Overdue balances are reviewed regularly by senior management. An aging analysis of the Group's trade receivables, that are past due but not impaired, is as follows:

	2014 HK\$'000	2013 HK\$'000
Past due:		
181 – 365 days	3,977	12,412
More than 365 days	9,006	39,316
	12,983	51,728

The Group reviews customer credit limit regularly based on historical repayment record. Trade receivables that were neither past due nor impaired related to a number of customers. Having considered the credit quality of the customers and the past experience of debts settlement, management of the Group is of the view that these trade receivables are fully recoverable and impairment loss on the receivables is not required to be made.

32. CONVERTIBLE LOAN NOTES AND EMBEDDED DERIVATIVES

On 9 August 2011 (the "Issue Date"), the Company issued 12% convertible redeemable notes (the "Convertible Loan Notes") due on 8 August 2016 (the "Maturity Date") at a principal amount of RMB33,000,000 (equivalent to approximately HK\$40,000,000) to an independent subscriber. Pursuant to the terms of the Convertible Loan Notes, the Notes are convertible into new shares of the Company during the period from 9 August 2012 up to the tenth day immediately before the Maturity Date. The Convertible Loan Notes could be initially converted into new shares of the Company at the conversion price of HK\$1.50 per share (the "Conversion Price"), subject to Conversion Price reset adjustment of which the Conversion Price will be adjusted to the lower of (i) the Conversion Price at the dates falling each three month anniversaries after the Issue Date (the "Price Reset Dates"); and (ii) the average closing price per share at the respective Price Reset Dates, subject to a minimum reset price of 40% of the initial Conversion Price, i.e. HK\$0.60 per share. The Company shall have the option to redeem the Convertible Loan Notes in whole or in part at the last day of the 24th calendar month from the Issue Date at a yield of 16% per annum. The amount payable shall be the principal amount of the Convertible Loan Notes so redeemed together with interest accrued thereon up to the redemption date. On the 26th, 36th and 48th calendar month from the Issue Date, the noteholder shall have the option to require the Company to redeem the Convertible Loan Notes at a yield of 15% per annum. On the Maturity Date, all outstanding Convertible Loan Notes will be redeemed at a yield of 15% per annum. As at 31 December 2012, the Conversion Price has been reset to HK\$0.60 and the Convertible Loan Notes can be converted up to an aggregate 79,497,114 ordinary shares of the Company, assuming a full conversion of the Convertible Loan Notes.

During the year ended 31 December 2013, at the request of the noteholder, the Company redeemed all of the Convertible Loan Notes on 9 October 2013 at a consideration of RMB35,956,376. Such consideration payable by the Company has been overdue at the end of the reporting period. Interest on the outstanding balance was charged at 18% per annum.

The Convertible Loan Notes contain two components, liability component and embedded derivatives. The liability component is carried at amortised cost with the effective interest rate of 34.66% per annum. The embedded derivatives are carried at fair value with change in fair value recognised in profit or loss. Movements of the liability component and embedded derivatives during the years are set out as follows:

	Liability component	Embedded derivatives	Total

(Gain)/loss in on change in fair value recognised profit or loss	(7,012)	3,925
At end of the year	2,064	9,076

On 9 August 2011, the Company issued 40 unlisted warrants to an independent investor, for a consideration of HK\$800,000. Each of the unlisted warrants entitles the holder to subscribe for 26,666,680 ordinary shares of the Company at an initial exercise price of HK\$1.50 per share (the "Exercise Price") during the period from 22 August 2011 to 8 August 2016 (the "Exercise Period"). The Exercise Price will be adjusted to the lower of (i) the Exercise Price at the Price Reset Dates; and (ii) the average closing price per share at the respective Price Reset Dates, subject to a minimum reset price of 40% of the initial Exercise Price. Any warrants remained outstanding after the Exercise Period will be lapsed and cancelled. On 9 May 2012, the Exercise Price has been reset to HK\$0.60 per share, which is the minimum reset price, and the unlisted warrants are convertible into 66,666,700 new shares of the Company. There was no change in the Exercise Price and no warrants were exercised, lapsed or cancelled during the period from 10 May 2012 up to 31 December 2014.

The unlisted warrants are stated at fair value, with any gains or losses from change in fair value recognised in profit or loss. The fair value of the unlisted warrants at 31 December 2014 and 2013 was valued by Shing Yin Appraisal Limited, an independent valuer, using Monte Carlo Simulation. The inputs into the models were as follows:

	2014	2013
Risk-free rate	0.397%	0.545%
Expected volatility	59.01%	58.66%
Expected life	1.58 years	2.58 years
Dividend yield	Nil	Nil

The risk-free rate was determined with reference to the yield rate of the Hong Kong Exchange Fund Notes with duration similar to the contractual tenor of the unlisted warrants.

The expected volatility was determined based on the historical volatility of the share prices of the Company.

The balance included deferred tax arising from revaluation of leasehold lands in Mainland China.

Under the EIT Law of the PRC, withholding tax is imposed on dividends declared in respect of the PRC subsidiaries from 1 January 2008 onwards. Deferred tax has not been provided for in the consolidated financial statements in respect of taxable temporary differences attributable to the profits earned by the Mainland China subsidiaries amounting to HK\$3,863,000 (2013: HK\$17,680,000) as the Group is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

At the end of reporting period, the Group has unused tax losses and other deductible temporary differences totalling approximately HK\$93,943,000 (2013: HK\$40,638,000) available for offset against future profits. No deferred tax asset has been recognised in respect of these deductible temporary differences due to the unpredictability of future profit streams.

36. SHARE OPTION SCHEME

The Group adopted a share option scheme (the "Scheme") which has become effective on 15 June 2012. In accordance with the Scheme, share options may be granted to any employees, consultants or professional advisors, and suppliers or customers of the Group.

The exercise price of the options granted is the highest of (i) the closing price of the Company's shares on the date of the offer of grant, which must be a business day; (ii) the average closing price of the Company's shares for the five trading days immediately preceding the date of the offer of grant; (iii) the nominal value of the share. The options are exercisable at the grant date and have a contractual option term of ten years. The Group has no legal or constructive obligation to repurchase or settle the options in cash.

The offer of a grant of share options may be accepted within 21 business days from the date of the offer of grant of the option. The consideration for a grant of options of the Company is HK\$1.00. The exercise period of the share options granted is determined by the Board of Directors.

The maximum number of shares of the Company which may be issued upon exercise of all options granted under the Scheme or any other share option scheme adopted by the Company must not in aggregate exceed 30% of its issued share capital of the Company from time to time. The total number of shares which may be issued upon exercise of all options to be granted under the Scheme and any other share option scheme of the Group must not in aggregate exceed 10% of the shares in issue as at the date of passing the relevant resolution adopting the Scheme unless it is approved by shareholders in a general meeting of the Company.

No share option was granted by the Company during both of the years ended 31 December 2014 and 31 December 2013.

No share option expense has been recognised by the Group for the year ended 31 December 2014 (2013: Nil) in relation to share options granted by the Company.

The weighted average exercise price of the share options granted and outstanding at the end of the reporting period is HK\$0.857 (2013: HK\$0.857) per share. The weighted average remaining contractual life of outstanding share options granted and outstanding at the end of the reporting period is 6.36 years (2013: 7.36 years).

37. RETIREMENT BENEFIT SCHEMES

The Group operates a Mandatory Provident Fund Scheme for all qualifying employees in Hong Kong. The assets of the plans are held separately from those of the Group in funds under the control of trustees. The Group's subsidiaries in the PRC, in compliance with the applicable regulations of the PRC, participate in social insurance schemes operated by the relevant local government authorities. The insurance premium is borne by the Group on a specified proportion of the employee's salaries laid down under the relevant PRC laws and regulations.

The total expense recognised in the consolidated statement of profit or loss and other comprehensive income of approximately HK\$133,000 (2013:HK\$768,000) represents contributions payable to these schemes by the Group at rates or amount specified in the rules of the schemes.

Apart from the above, the Group has no significant obligations under retirement benefit schemes at the end of both of the years presented.

39. CONTINGENT LIABILITIES AND COMMITMENTS

As at 31 December 2014, the Group had the following contingent liabilities and commitments:

(a) Contingent liabilities

During the year, a writ of summons dated 16 July 2014 was issued by a third party, Total Shares Limited ("Total Shares"), claiming against the Company and Mr. Shan Xiaochang ("Mr. Shan"), a director of the Company, in respect of a sum of HK\$10,000,000 which was advanced by Total Shares to Mr. Shan, the repayment of which was guaranteed by the Company. The Company has contested the case vigorously. Having sought legal advices, the directors are of the opinion that the Company has a good defence against the allegation and the legal action would not result in a material loss to the Group, accordingly no provision for liabilities has been made in the consolidated financial statements. Mr. Shan resigned as director of the Company with effect from 25 March 2015.

(b) Operating leases

As lessee

At the end of reporting period, the Group had commitments for future minimum lease payments under non-cancellable operating leases which fall due as follows:

	2014 HK\$'000	2013 HK\$'000
Within the first year	1,528	1,819
In the second to the fifth year inclusive	–	1,528
	1,528	3,347

Operating lease payments represent rental payables by the Group for certain of its office premises. Leases and rentals are negotiated and fixed respectively for an average of three years.

40. RELATED PARTY TRANSACTIONS

- (a) In addition to the transactions detailed elsewhere in these consolidated financial statements, the Group entered into the following transactions with related parties during the year:

Sales and purchases

	2014 HK\$'000	2013 HK\$'000

41. CAPITAL MANAGEMENT

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balances. The Group's overall strategy remains unchanged from that of the prior year.

The capital structure of the Group consists of net debts (bank and other borrowings less bank balances and cash) and equity attributable to owners of the Company, comprising issued share capital and reserves.

The Group actively and regularly reviews and manages its capital structure to ensure optimal capital structure and shareholders' returns, taking consideration of future capital requirements of the Group and capital efficiency, prevailing and projected profitability, projected operating cash flows, projected capital expenditures and projected strategic investment opportunities. The Group currently does not adopt any formal dividend policy.

42. FINANCIAL INSTRUMENTS

42. FINANCIAL INSTRUMENTS (continued)

(b) Financial risk management objectives and policies

The Group's major financial instruments include trade and other receivables, bank balances and cash, trade and other payables, corporate bonds payable, other borrowings, amount due to noteholder, amount due to a director, and unlisted warrants. Details of these financial instruments are disclosed in respective notes. The risks associated with these financial instruments include market risk (currency risk and interest rate risk), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure that appropriate measures are implemented on a timely and effective manner. There has been no change to the types of the Group's exposure in respect of financial instruments or the manner in which it manages and measures the risks.

Currency risk

Foreign exchange risk arises when the group entities enter into transactions denominated in a currency other than their functional currency. The Group's monetary assets and liabilities are mainly denominated in Renminbi, United States dollars and Hong Kong dollars. The exchanges rates among these currencies are not pegged except US dollars and HK dollars, and there are fluctuations of exchange rates among these currencies.

The Group currently does not have a foreign currency hedging policy. However, the management will closely monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

The carrying amounts of the monetary assets and monetary liabilities at the reporting date denominated in currencies other than functional currencies of the related entities are as follows:

	Assets		Liabilities	
	2014 HK\$'000	2013 HK\$'000	2014 HK\$'000	2013 HK\$'000
RMB	–	–	24,138	45,970

Sensitivity analysis

The following table indicates the approximate change in the Group's profit or loss after income tax expense in response to reasonably possible changes in the foreign exchange rates to which the Group has significant exposure at the end of reporting period. The sensitivity analysis includes balances of assets and liabilities of the group entities where the denomination of these balances is in a currency other than the functional currencies of these entities. A positive number below indicates a decrease in loss for the year (2013: an increase in profit) where the functional currency strengthens against the relevant currency. For a weakening of the functional currency against the relevant currency, there would be an equal and opposite impact on the profit or loss, and the balances below would be negative.

	2014		2013	
	Increase in foreign exchange rate %	Effect on loss for the year HK\$'000	Increase in foreign exchange rate %	Effect on profit for the year HK\$'000

42. FINANCIAL INSTRUMENTS (continued)

(b) Financial risk management objectives and policies (continued)

Interest rate risk

The Group currently does not have an interest rate hedging policy. However, the management monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arise. The Group is exposed to interest rate risk as the group entities may borrow funds at both fixed interest rates and floating interest rates. The Group manages the risk by maintaining an appropriate mix between fixed and floating rate borrowings. Although the board of directors accepts that this policy neither protects the Group entirely from the risk of paying rates in excess of current market rates nor eliminates fully cash flow risk associated with interest payments, it considers that it achieves an appropriate balance of exposure to these risks.

The directors consider that the Group's exposure to interest rate risk of bank deposits, which are short term in nature, is not significant, accordingly no sensitivity analysis is presented.

The Group's borrowings at end of each of the reporting periods presented carry interests at fixed interest rates, analysed below:

The Group

	2014		2013	
	Effective interest rate %	Carrying amount HK\$'000	Effective interest rate %	Carrying amount HK\$'000
Fixed rate borrowings				
– corporate bonds payable	4%-10%	24,014	–	–
– other borrowings	5%-25%	33,224	–	–
– amount due to noteholder	45%	24,138	18%	45,970

Sensitivity analysis

The Group had no floating rate borrowings at end of each of the reporting periods presented. Accordingly, there would have no impact on the results of the Group for the year (2013: Nil) upon any change in interest rate on floating rate borrowings assuming that no floating rate borrowings were outstanding during the year.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

31 December 2014

42. FINANCIAL INSTRUMENTS (continued)

(b) Financial risk management objectives and policies (continued)

Credit risk

The Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position.

In order to minimise the credit risk, the management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual debt at the end of each reporting period to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

At 31 December 2014, the Group has concentration of credit risk as 59% (2013: 39%) and 100% (2013: 89%) of the trade receivables (net of impairment) were due from one customer and five customers respectively.

At 31 December 2014, the Group has also significant concentration of credit risk arising from the amounts due from third parties amounted to HK\$5,463,000 (2013: HK\$12,700,000) included in other receivables.

The credit risk on liquid funds is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies.

None of the Group's financial assets are secured by collateral or other credit enhancements. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the consolidated statement of financial position of the Group after deducting any impairment losses.

Liquidity risk

In the management of the liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate by the management to finance the Group's operations and mitigate the effects of fluctuations in cash flows.

The Group relies on corporate bonds payable as a significant source of liquidity. As at 31 December 2014, the Group has no available unutilised banking facilities (2013: Nil).

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities. For non-derivative financial liabilities, the table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The table includes both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period.

In addition, the following tables detail the Group's expected maturity for its non-derivative financial assets. The tables have been drawn up based on the undiscounted contractual cash flows of the financial assets including interest that will be earned on those assets. The inclusion of information on these non-derivative financial assets is necessary in order to understand the Group's liquidity risk management as the liquidity is managed on a net asset and liability basis.

(c) Fair value measurement

- (i) Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

The Group's financial liabilities at fair value through profit or loss, representing the unlisted warrants, are measured at fair value at the end of the reporting period. The following table gives information about how the fair values of these financial liabilities are determined in particular, the valuation technique(s) and input used.

Financial liabilities	Fair value as at 31 December		Fair value hierarchy	Valuation technical(s) and key inputs
	2014 HK\$'000	2013 HK\$'000		
Unlisted warrants	2,064	9,076	Level 2	Monte Carlo Simulation (Note 33)

There were no transfer of the financial liabilities between the levels in both of the years presented.

- (ii) Fair value of financial assets and financial liabilities that are not measured at fair value on a recurring basis (but fair value disclosures are required)

The directors consider that the carrying amounts of financial assets and financial liabilities at amortised cost in the consolidated financial statements approximate their fair values. The fair values, which are included in Level 3 categories, have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflect the credit risk of counterparties.

- (iii) Reconciliation of Level 3 fair value measurements

The financial liabilities at fair value through profit or loss are measured at fair value on Level 2 fair value measurement. Reconciliation of Level 3 fair value measurements is not presented.
