

**CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)**

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

*Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.*

## MANAGEMENT DISCUSSION AND ANALYSIS

### BUSINESS REVIEW

#### **Heilongjiang Province Shengyan New Energy Development Limited (“Shengyan”)**

Shengyan was incorporated in the PRC in July 2010 with a registered capital of RMB30 million and is principally engaged in the production and sale of straw fuel briquettes, which is a type of biofuels and a substitute for coal in the northeast region of the PRC. The Group completed the acquisition of its 51% interest in Shengyan in December 2012. The business model of Shengyan is briefly summarised as follows:

- Straw collection – purchase, collect and strap raw straw from farmers and transport to the warehouses for storage;
- Straw chopping – the collected straw is then crushed into fine powder through crushing equipments;
- Straw briquetting – the powdered straw is then put into the briquetting press machines from where it is compressed and processed before straw fuel briquettes are made; and
- Sale of finished products – upon receiving sales orders, the straw fuel briquettes are then sold to customers.

The customers of Shengyan are mainly consisted of companies located at Heilongjiang Province in the PRC, which are engaged in agricultural and manufacturing industries and use the straw fuel briquettes for different usage such as heat generation. Revenue of Heilongjiang Shengyan is mainly derived from the sale of straw fuel briquettes by sales orders from customers and Shengyan purchases raw straw directly from many different local farmers located at the Baiquan County of Heilongjiang Province.

During the second quarter of this year, Shengyan has recorded a sales income of approximately HK\$4.2 million (2013: HK\$5.1 million). The reduction is mainly caused by a halt in production when Shengyan was engaging in the seasonal inspection and maintenance of production plants.

#### **Jiangsu Shengyi Environmental Technology Company Limited (“Shengyi”)**

Shengyi was principally engaged in the provision of technological desulphurization service, which could effectively reduce sulfur dioxide and hydrogen sulfide emissions generated from burning of fossil fuels such as coal, natural gas and oil products.
